Received from [redacted]

\$2,000.00

Expenditures:

- 1. Materials imported from [redacted]
 - 2 Kymographys [redacted] with drums of 6 and 12 in.
 - 2 infusion pump [redacted]
 - 1 kymograph [redacted] with 6 in drum
 - 1 time maker record [redacted]

\$ 896.91

- 2. Material purchased with [redacted] Money

Exchange [redacted] \$90 [redacted]
\$203.09 [redacted]

\$1,103.09

Using an average rate of [redacted] the following were purchased at the approximate \$ value of

- 1 Deep freezer [redacted] 325.00
- 1 Tonometer of [redacted] 21.00
- 1 tape record with accessories 120.00
- 1 oxigenator for water bath 7.00
- 1 oven and surgical material and syringes 117.00
- drugs 64.00
- Physiological material:
 - Levers, cannules, mercury manometers from IBRCC 212.00
 - 1 balance (to 0.1g) 67.00
 - Picture rolls 25.00
 - Paper cutter 26.00
 - Mercury 23.00
 - Surgical material 57.00
 - Animals (cats, fowls, rabbits and dogs) 32.00
 - Food for animals 7.09

\$2,000.00

This is a true statement of expenditures as reported to the fund.

I certify that services or materials have been satisfactorily received and the expenditures were incurred on official business.

122-15

August 15, 1960

MEMORANDUM TO: [REDACTED]

A

SUBJECT: Project Proposal entitled: [REDACTED]

[REDACTED] Principal Investigator:

This proposal has been circulated to [REDACTED] and [REDACTED]. All comments appear favorable, particularly those of [REDACTED] who is a professor of pharmacology at the [REDACTED]. It would appear from his evaluation that this research could constitute a fine scientific contribution. [REDACTED] as you may know, has worked with [REDACTED] here at [REDACTED] and recently returned to [REDACTED].

C
B

B

C

My only comments are: 1) I do not feel personally able to judge the significance of the research except from a general point of view and, from that standpoint, it appears to be very important; and 2) my only other reaction is the same as is the observation by [REDACTED] which questions the immediate relevance of this proposal to the field of [REDACTED]. If this observation can be rationalized, then I would feel that the positive comments of the Directors and Advisers can lead only to recommendation for approval to support this project.

C
B

[REDACTED]

Program Director

Enc: 2 copies of Proposal

128-15

May 1, 1960.

[REDACTED]

B

Dear Sirs:

B

I have enclosed a proposal for consideration by the [REDACTED] for support for a series of studies concerned with Neurokinin, a substance that appears to be of great importance in the pathological mechanisms by which man's relationship to his environment influences health.

Sincerely yours,

C [REDACTED]

Discussed but
no comment.

122-15

PROPOSAL

1. Title: [REDACTED] ^c

Author: [REDACTED] ^{B/E}

Institution: Department of Pharmacology, University of [REDACTED]

The central nervous system evokes, integrates, and modulates the body's adaptive responses to the environment. These responses, necessary to survival when appropriate, are implicated in the etiology and course of disease of many categories when inappropriate. It is well established that reactivity to noxious stimulation can be modulated by the central nervous system through control of the timing and amount of adrenal cortical stimulating hormone (ACTH) from the pituitary gland. Recent experiments at the [REDACTED] have shown that another major route for central nervous system modulation of the inflammatory response exists. This latter route is through vasomotor control and through modification of the magnitude of local, neuronal reflexes. A potent vasodilator substance is implicated in these reactions.

The applicant has been one of the [REDACTED] who has defined ^c this biochemical substance as neurokinin. Neurokinin apparently is a vasodilator polypeptide formed by the splitting of a protein (globulin) present in extracellular fluid. This splitting is due to the action of a proteolytic enzyme (neurokinin forming enzyme), possibly an intraneuronal protease. The same enzyme has been observed

in the cerebrospinal fluid and in perfusate of the cerebral ventricle during stimulation of the brain, thus giving a source of the material for study. A crude preparation of powdered neurokinin has been prepared by incubation of globulin with cerebrospinal fluid collected from patients with schizophrenia, which contains large amounts of neurokinin-forming enzyme. The application has worked with [redacted] and [redacted] in the definition of this agent and in the preparation of crude neurokinin.

e) Immediate Objectives

To prepare and characterize highly purified neurokinin by chromatographic chemical methods.

f) Long Range Objectives

To define the pharmacologic properties, and contribute to understanding of the physiological and pathological significance of neurokinin.

II. Methods

a) Obtain neurokinin forming enzyme from human cerebrospinal fluid and from perfusate of cerebral ventricles of laboratory animals during stimulation of the brain.

b) Preparation of crude neurokinin by incubation of cerebrospinal fluid with globulin, precipitation, and extraction with alcohol.

c) Purification of the crude preparation by paper and column chromatographic separation of the components in the crude preparation.

d) Pharmacologic studies to identify the active fraction

- a. isolated rat uterus, rat duodenum bioassay and assay of depressor action on the blood pressure.

e) Pharmacologic characterization of the properties of purified neurokinin.

1) Electroencephalographic changes induced by intraventricular and intercarotid injection in the cat.

2) Behavioral changes induced by intraventricular injections of neurokinin into unanesthetized cats with implanted intraventricular cannulae.

III. It is expected that these studies will require one year to complete.

IV. Budget

a) Apparatus to augment equipment available in the [REDACTED]

[REDACTED]

F/B

1) Stereotoxic (Horsely Clark) apparatus for perfusion of cerebral ventricles and for placement of intraventricular cannulae \$900.00

2) Perfusion pump 200.00

3) Small polyethylene Tubing 50.00

4) Recording kymograph for smooth muscle bioassay 250.00

5) Miscellaneous equipment, manometer, clamps, cannulae 100.00

b) Drugs and supplies for electrophoresis and for pharmacologic studies 300.00

c) Animals, animal food, and cages 200.00

TOTAL \$2,000.00

MEMORANDUM FOR: THE RECORD

SUBJECT : Discussion with [redacted] on [redacted] Proposal

1. At 1100 I met with Mr. [redacted] to brief him on the [redacted] proposal. [redacted] showed considerable interest in the [redacted] mechanism, its origin and its function (stemming in part from his participation in the old [redacted]). I assured him, in answer to his question, that arrangements could be made to approach grantees to undertake [redacted] missions. Further, if his division needed a funding mechanism with sound cover to promote any [redacted] that could be fitted into the cover, the [redacted] was available to help out.

2. Although [redacted] saw no immediate need, he was genuinely enthusiastic and wished to make division brass aware of the possibilities.
